

Enhance school safety & efficiency with Envoy's digital sign-in

Help your school embrace the digital age with Envoy: our simple and safe visitor management system.

A paper and pen "system" really isn't much of a system at all. Cumbersome and unreliable, there's no way to make the information you collect work for you.

Envoy's customizable iPad app gives you control over the information you collect from visitors, to enhance campus safety and security.

Create a shared awareness of who's on campus.

Since our web dashboard updates in real time, you'll always know who's walking the halls. View the dashboard on any computer or smartphone, and on multiple devices.

With badge printing, it's easy to spot unauthorized visitors. Create custom badges to show school spirit!

Sign in faster using Envoy Passport

Envoy Passport uses iBeacon technology to send your sign-in details directly to the iPad, so you can skip the typing.

Simply download Envoy on your phone, and your avatar will pop up when you're near the iPad. Just tap to sign in!

Supercharge office operations.

Empower your school receptionists to skip the paper pushing. Imagine being able to report volunteers, district specialists, or substitutes, in just a few keystrokes.

Our analytic and reporting functions make it easy to identify trends in who's visiting, when, and why. Use these powerful insights to help you make smart decisions about valuable school resources.

Why schools choose Envoy?

Go from signing up to signing in visitors in about ten minutes. And with minimal account maintenance required, daily use is a breeze.

All visitor data and directory entries are encrypted, stored on secure servers, and kept confidential. In the unlikely event of server downtime, your iPad stores data offline.

You'll always get swift customer service from real people, not robots. Our average live chat response time is under one minute. We're also happy to help over phone and email.
