E Envoy

How Envoy can help you stay ITAR compliant

ITAR (International Traffic in Arms Regulations) is designed to help ensure that defense-related technology does not get into the wrong hands. The United States government requires manufacturers, exporters, and brokers of defense articles, defense services or related technical data to be ITAR compliant. Businesses that need to prove they are ITAR compliant, but can't, can face both civil and criminal penalties.

The impact of compliance on companies means that IT, security, and operations teams feel even more pressure to build sustainable infrastructure and processes to not only be compliant but to prove it when an audit comes around. Part of a company's operational infrastructure includes visitor management. With Envoy, businesses don't have to choose between ironclad security compliance and providing an amazing visitor experience.

Maintain ITAR compliance with Envoy

Envoy helps businesses stay ITAR compliant by verifying citizenship and giving you full control over visitor access.

Collect all the visitor information your company needs.

Personalize your visitor sign-in process to meet your business compliance needs with conditional sign-in flows by visitor type, required questions like country of origin or citizenship, headshot photo, and waivers.

Verify visitor identity and keep unwanted visitors out.

Create a block list of unwelcome guests, scan government IDs, and cross-check individuals on third-party lists to automatically get notified of any suspicious visitors.
