

Envoy Protect

Manage hybrid schedules and keep employees healthy

Empower your team to work together in a hybrid workplace and rest assured they'll arrive and leave healthy.

Plan to work as a team on-site

Empower employees to set and sync their schedules, so they can collaborate and make the most of their time in the workplace.

Ensure employees are healthy before they arrive

Give employees the choice to certify their health through proof of vaccination, a weekly COVID test, or a daily health check.

Take control of who can access your building

Set criteria for who is allowed to work on-site and layer in extra security by connecting your access control system, so only approved employees can badge into your workplace.

How it works

Step 1: See who's working when

Discover which days your project team, manager, or work friends plan to work on-site, so you can sync your schedules.

Step 2: Set your workplace schedule

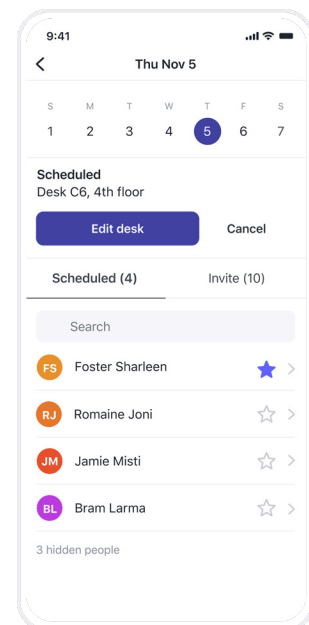

Reserve a spot in the workplace and let others know when they can find you on-site by selecting the days you plan to go in.

Step 3: Certify that you're healthy

Upload proof of vaccination or a weekly negative COVID test, or complete a daily health check to confirm you're healthy.

Step 4: Sign in when you arrive

Signing in instantly grants you access to the workplace, so you can unlock any doors or elevators that stand between you and your desk.
